

CHEMUNEX[®] SCANRDI[®]

POWERFUL PARTNERS FOR MICROBIAL DETECTION & STERILITY TESTING

Improve your productivity

PIONEERING DIAGNOSTICS

CHECKMATE IN 3 HOURS!

You are in control

- Out of specs investigation
- Raw material inspection
- Release of finished products
- In process control
- Environmental monitoring
- Water analysis

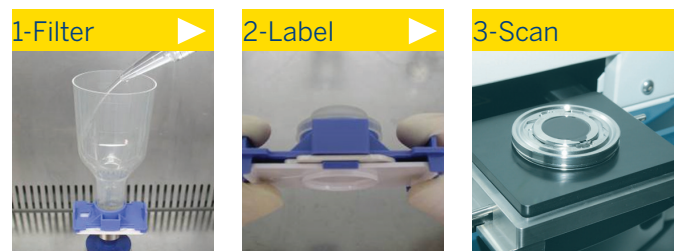

Productivity is key

- Reduce QC holding time
- Optimize inventory
- Avoid risks
- Recognized by the FDA as an alternative method for sterile product release

CHEMUNEX[®] SCANRDI[®]

In 3 hours from sampling to result,
you know you can continue with
your production or if you need
to act immediately.

IN JUST 3 STEPS

WHAT IS SCANRDI?

- Solid phase cytometry for filterable products
- Direct cell count down to one microorganism: bacteria, Yeast, Molds, Spores, stressed cells, fastidious organisms, Viable But Non Cultivable Microorganisms (VBNC)
- No growth required
- Linear response from 1 to 5000 microbial cells

- Compounding pharmacy and pharmaceutical applications
- Robust and easy to use
- 21 CFR 11 compliant
- Comprehensive documentation, training and validation support available
